CONTENTS

RECENT ADVANCES IN STEROID BIOCHEMISTRY

PROCEEDINGS OF THE NINTH INTERNATIONAL SYMPOSIUM OF *THE JOURNAL OF STEROID BIOCHEMISTRY*

Preface ix

List of Participants xi

I. Steroid Receptors and Gene Expression

M. A. Carson-Jurica, A. T. Lee, A. W. Dobson, O. M. Conneely, W. T. Schrader and B. W. O'Malley 1 Interaction of the chicken progesterone receptor with heat shock protein (HSP) 90

Emily P. Slater, Gerhard Posseckert, Georges Chalepakis, Gerard Redeuihl and Miguel Beato 11 Binding of steroid receptors to the HREs of mouse mammary tumor virus, chicken and xenopus vitellogenin and rabbit uteroglobin genes: correlation with induction

Walter Wahli, Ernest Martinez, Blaise Corthésy and Jean-René Cardinaux 17 *Cis*- and *trans*-acting elements of the estrogen-regulated vitellogenin gene B1 of *Xenopus laevis*

J. A. Lees, S. E. Fawell and M. G. Parker 33 Identification of constitutive and steroid-dependent transactivation domains in the mouse oestrogen receptor

Shutsung Liao, John Kokontis Tetsujun Sai and Richard A. Hiipakka 41 Androgen receptors: structures, mutations, antibodies and cellular dynamics

Jan-Åke Gustafsson, Ann-Charlotte Wikström and Marc Denis 53 The non-activated glucocorticoid receptor: structure and activation

Jacques Drouin, Yu Lin Sun and Mona Nemer 63 Glucocorticoid repression of pro-opiomelanocortin gene transcription

Wolfgang Höck, Finian Martin, Rolf Jaggi and Bernd Groner 71 Regulation of glucocorticoid receptor activity

Frédéric P. Lemaigre, Stéphane J. Courtois, Serge M. Durviaux, Christine J. Egan, Dominique A. Lafontaine and Guy G. Rousseau 79 Analysis of *cis*- and *trans*-acting elements in the hormone-sensitive human somatotropin gene promoter

Eduardo Ortí, Dirk B. Mendel, Lynda I. Smith, Jack E. Bodwell and Allan Munck 85 A dynamic model of glucocorticoid receptor phosphorylation and cycling in intact cells

R. Chirino, A. López, D. Navarro, J. J. Cabrera, J. F. Rivero and B. N. Díaz-Chico 97 Steroid induction of low-affinity glucocorticoid binding sites in rat liver microsomes

II. Steroids, Anti-Steroids, Growth Factors and Cancer

Marc E. Lippman and Robert B. Dickson 107 Mechanisms of normal and malignant breast epithelial growth regulation

Adrian L. Harris, Stewart Nicholson, J. Richard C. Sainsbury, John Farndon and Chris Wright 123 Epidermal growth factor receptors in breast cancer: association with early relapse and death, poor response to hormones and interactions with *neu*

R. J. B. King, D. Y. Wang, R. J. Daly and P. D. Darbre 133 Approaches to studying the role of growth factors in the progression of breast tumours from the steroid sensitive to insensitive state

Andrew C. B. Cato, Jutta Weinmann, Sigrun Mink, Helmut Ponta, David Henderson and Arnoud Sonnenberg	139	The regulation of expression of mouse mammary tumor virus DNA by steroid hormones and growth factors
William L. McGuire and Gary M. Clark	145	Prognostic factors for recurrence and survival in axiliary node-negative breast cancer
Edward M. Blank and Roberto L. Ceriani	149	Fish oil enhancement of ^{131}I-conjugated anti-human milk fat globule monoclonal antibody experimental radioimmunotherapy of breast cancer
J. R. Pasqualini, C. Gelly, B.-L. Nguyen and C. Vella	155	Importance of estrogen sulfates in breast cancer
J. Watanabe, C. F. Holinka, Y. Anzai, H. Kuramoto and E. Gurpide	165	Effects of serine and glycine on proliferation of an Ishikawa cell variant
V. Craig Jordan, M. M. Gottardis, S. P. Robinson and A. Friedl	169	Immune-deficient animals to study "hormone-dependent" breast and endometrial cancer
Henri Rochefort, Vincent Cavailles, Patrick Augereau, Françoise Capony, Thierry Maudelonde, Isabelle Touitou and Marcel Garcia	177	Overexpression and hormonal regulation of pro-cathepsin D in mammary and endometrial cancer
A. E. Wakeling	183	Comparative studies on the effects of steroidal and nonsteroidal oestrogen antagonists on the proliferation of human breast cancer cells
Fernand Labrie, Van Luu-The, Claude Labrie, Dominique Bérubé, Jacques Couet, Hui-Fen Zhao, Richard Gagné and Jacques Simard	189	Characterization of two mRNA species encoding human estradiol 17β-dehydrogenase and assignment of the gene to chromosome 17
C. Mercier-Bodard, F. Baville, G. Bideux, N. Binart, B. Chambraud and E.-E. Baulieu	199	Regulation of SBP synthesis in human cancer cell lines by steroid and thyroid hormones
		III. Steroids and the Central Nervous System
Maria L. Dufau, Salvatore Ulisse, Azra Khanum, Ellen Buczko, Masaya Kitamura, Andrea Fabbri and Mikio Namiki	205	LH action in the Leydig cell: modulation by angiotensin II and corticotropin releasing hormone, and regulation of $P450_{17\alpha}$mRNA
Junzo Kato	219	Arachidonic acid as a possible modulator of estrogen, progestin, androgen, and glucocorticoid receptors in the central and peripheral tissues
		IV. Steroids and the Immune System
Michael G. Steele and Charles R. Wira	229	IgA in uterine tissue: effect of estrous cycle, hormone treatment and intrauterine immunization
Hugo O. Besedovsky and Adriana del Rey	235	Mechanism of virus-induced stimulation of the hypothalamus–pituitary–adrenal axis
C. Grossman	241	Possible underlying mechanisms of sexual dimorphism in the immune response, fact and hypothesis
David A. Sullivan and Louane E. Hann	253	Hormonal influence on the secretory immune system of the eye: endocrine impact on the lacrimal gland accumulation and secretion of IgA and IgG
Elizabeth M. Dax, Nancy S. Pilotte, William H. Adler, James E. Nagel and W. Robert Lange	263	The effects of 9-ene-tetrahydrocannabinol on hormone release and immune function
		V. Steroids and Mineral Metabolism (Including Osteoporosis in Menopause)
J. Müller, C. Meuli, C. Schmid and M. Lauber	271	Adaptation of aldosterone biosynthesis to sodium and potassium intake in the rat

Matthias Ernst, Joan K. Heath, Christoph Schmid, Rudolf E. Froesch and Gideon A. Rodan	279	Evidence for a direct effect of estrogen on bone cells *in vitro*
Timothy Kenney Gray	285	Estrogens and the skeleton: cellular and molecular mechanisms
		VI. Poster Presentations
A. M. Kaye, L. Shinkarenko, A. Waisman, T. Victor and H. Degani	289	Estradiol induction of accelerated energy metabolism in prepuberal rat uteri *in vitro*: mRNA hybridization and [^{13}C]NMR studies
Timo K. Joensuu and Pentti J. Tuohimaa	293	Ontogeny of the estrogen receptor in the chick oviduct
Nora Giambiagi and Jorge R. Pasqualini	297	Transformation of the estrogen receptor detected by two monoclonal antibodies
Anne Vessières, Colette Vaillant, Michèle Salmain and Gérard Jaouen	301	Organometallic derivatives of estradiol as bioligands: targetted binding of the estradiol receptor
A. O. Brinkmann, P. W. Faber, H. C. J. van Rooij, G. G. J. M. Kuiper, C. Ris, P. Klaassen, J. A. G. M. van der Korput, M. M. Voorhorst, J. H. van Laar, E. Mulder and J. Trapman	307	The human androgen receptor: domain structure, genomic organization and regulation of expression
Chawnshang Chang, Gerald Chodak, E. Sarac, Hiroyuki Takeda and Shutsung Liao	311	Prostate androgen receptor: immunohistological localization and mRNA characterization
Soheil Meshinchi and William B. Pratt	315	Evidence that removal of an endogenous metal that stabilizes the untransformed glucocorticoid receptor in cytosol allows ligand-independent receptor transformation
Donald J. Gruol, Kristal A. Wolfe and Sheila Safarian	319	Analysis of glucocorticoid receptor subspecies binding to DNA–cellulose and isolated nuclei
Fouad Guendouz, Philippe Blanchardie, Marc Denis, Jean-Luc Orsonneau and Patrick Lustenberger	325	Occurrence of glucocorticoid binding sites in solubilized microsomes from rat liver
M. Laux, H. Bauer, U. Ganten, F. Zimmerman and P. Vecsei	331	Glucocorticoid receptors and dissociation constant (K_d) are decreased in mononuclear leukocytes of spontaneously hypertensive rats (SHR-SP) as compared to normotensive Wistar–Kyoto rats (WKY)
N. H. Tsawdaroglou, A. Georgakopoulos and E. Nikodimou	333	Insulin enhances glucocorticoid induction of gene expression in a sequence specific manner
Blake C. Osmundsen, Hosea F. S. Huang, Mary B. Anderson, Sylvia Christakos and Marian R. Walters	339	Multiple sites of action of the vitamin D endocrine system: FSH stimulation of testis 1,25-dihydroxyvitamin D_3 receptors
S. Salomaa, A. Pekki, T. Sannisto, T. Ylikomi and P. Tuohimaa	345	Progesterone receptor is constitutively expressed in chicken intestinal mesothelium and smooth muscle
A. Pekki, T. Joensuu, K. Vidqvist, D. Toft and P. Tuohimaa	351	Progesterone receptor concentration differences in the chick oviduct cells and apparent down-regulation by ligand. A semiquantitative immunohistochemical study
J.-P. Mornon, V. Bissery, C. Gaboriaud, A. Thomas, T. Ojasoo and J. P. Raynaud	355	Hydrophobic cluster analysis (HCA) of the hormone-binding domain of receptor proteins
Gian Paolo Rossini and Giovanni Masci	363	Chemical crosslinking: a useful tool for evaluations of steroid receptor structures and their functional states in intact cells

Nadine Binart, Béatrice Chambraud, Jonathan M. Levin, Jean Garnier and Etienne-Emile Baulieu	369	A highly charged sequence of chick hsp90: a good candidate for interaction with steroid receptors
Scott Cuthill, Janet Hapgood, Marc Denis, Anna Wilhelmsson, Grant Mason, Takayuki Nemoto, Eva Widmark, Lorenz Poellinger and Jan-Åke Gustafsson	375	Ligand-dependent interaction of the dioxin receptor with target DNA
Jean-Guy Lehoux, Andrée Lefebvre, Serge Bélisle and Diego Bellabarba	379	Hormonal regulation of 3-hydroxy-3-methylglutaryl coenzyme A reductase mRNA in the rat adrenal gland
André Tremblay and Jean-Guy Lehoux	385	Effects of dietary sodium restriction and potassium intake on cholesterol side-chain cleavage cytochrome *P*-450 and adrenodoxin mRNA levels
Chawnshang Chang, John Kokontis Shutsung Liao and Yijan Chang	391	Isolation and characterization of human TR3 receptor: a member of steroid receptor superfamily
Martine Dumont, Sophie Dauvois, Jacques Simard, Teresa Garcia, Beth Schachter and Fernand Labrie	397	Antagonism between estrogens and androgens on GCDFP-15 gene expression in ZR-75-1 cells and correlation between GCDFP-15 and estrogen as well as progesterone receptor expression in human breast cancer
Margaret Ghilchik, N. A. Shaikh, P. A. Beranek, M. J. Reed and Hannelore Braunsberg	403	The effects of sequential treatment with ethynyloestradiol and medroxyprogesterone acetate on oestrogen and progestogen receptors in breast cancer
Catherine S. Murphy and V. Craig Jordan	407	Structural components necessary for the antiestrogenic activity of tamoxifen
D. Philibert, M. Hardy, M. Gaillard-Moguilewsky, F. Nique, C. Tournemine and L. Nédélec	413	New analogues of mifepristone with more dissociated antiprogesterone activities
M. A. Blankenstein, C. van der Meulen-Dijk and J. H. H. Thijssen	419	Effect of steroids and antisteroids on human meningioma cells in primary culture
J. M. Quesada, R. Solana, A. Martin, M. Santamaria, I. Serrano, M. E. Martinez, P. Aljama and J. Peña	423	The effect of calcitriol on natural killer cell activity in hemodialyzed patients
W. Wouters, R. De Coster, R. W. Tuman, C. R. Bowden, J. Bruynseels, H. Vanderpas, P. Van Rooy, W. K. Amery and P. A. J. Janssen	427	Aromatase inhibition by R 76713: experimental and clinical pharmacology
E. di Salle, G. Briatico, D. Giudici, G. Ornati and T. Zaccheo	431	Aromatase inhibition and experimental antitumor activity of FCE 24304, MDL 18962 and SH 489
Y. Nishino, M. R. Schneider, H. Michna and M. F. El Etreby	435	Antitumor effect of a specific aromatase inhibitor, 1-methyl-androsta-1,4-diene-3,17-dione (atamestane), in female rats bearing DMBA-induced mammary tumors
Yusuf J. Abul-Hajj	439	The effect of the aromatase inhibitor, 4-(phenylthio)-4-androstene-3,17-dione, on dimethylbenz(A)anthracene-induced rat mammary tumors
A. Purohit, L. C. Lai, A. Singh, N. G. Coldham, M. W. Ghilchik, M. J. Reed and V. H. T. James	443	The effect of medroxyprogesterone acetate on aromatase and DNA polymerase α activities in breast tumours
H. Michna, M. R. Schneider, Y. Nishino and M. F. El Etreby	447	The antitumor mechanism of progesterone antagonists is a receptor mediated antiproliferative effect by induction of terminal cell death.
K. Weindel, S. Lewicka and P. Vecsei	455	Comparative dose–effect studies with four C-17-spirosteroidal mineralocorticoid synthesis inhibitors
C. Schuster, S. Chasserot-Golaz and G. Beck	461	Binding studies of the antiglucocorticoid RU38486 in Daudi and Raji lymphoma cells

J. H. Abalain, E. Quemener, J. L. Carre, B. Simon, Y. Amet, P. Mangin and H. H. Floch — 467 Metabolism of androgens in human hyperplastic prostate: evidence for a differential localization of the enzymes involved in the metabolism

S. Chasserot-Golaz, P. Parcollet and G. Beck — 473 Interrelationship between RU38486 and the *P*450 activities in rat liver

R. D. Stith, R. E. McCallum and M. R. Hill — 479 Effect of interleukin-6/interferon-β_2 on glucocorticoid action in rat hepatoma cells

C. K. W. Watts, M. G. Parker and R. J. B. King — 483 Stable transfection of the oestrogen receptor gene into a human osteosarcoma cell line

D. Navarro, J. J. Cabrera, O. Falcón, P. Jiménez, A. Ruiz, R. Chirino, A. López, J. F. Rivero, J. C. Díaz-Chico and B. N. Díaz-Chico — 491 Monoclonal antibody characterization of progesterone receptors, estrogen receptors, and the stress-responsive protein of 27 kDa (SRP27) in human uterine leiomyoma

C. Lubrano, E. Petrangeli, A. Catizone, A. Santonati, G. Concolino, N. Rombolá, L. Frati, F. Di Silverio and F. Sciarra — 499 Epidermal growth factor binding and steroid receptor content in human benign prostatic hyperplasia

M. A. Llorens, M. J. Bermejo, M. C. Salcedo, A. L. Charro and M. Puente — 505 Epidermal growth factor receptors in human breast and endometrial carcinomas

Ingrid Jung-Testas, Zhong Yi Hu, Etienne-Emile Baulieu and Paul Robel — 511 Steroid synthesis in rat brain cell cultures

Hideo Honjo, Yoshio Ogino, Kazuo Naitoh, Mamoru Urabe, Jo Kitawaki, Jinsuke Yasuda, Takara Yamamoto, Sadanao Ishihara, Hiroji Okada, Takeshi Yonezawa, Kenzo Hayashi and Toshio Nambara — 521 *In vivo* effects by estrone sulfate on the central nervous system–senile dementia (Alzheimer's type)

H. Adlercreutz, T. Fotsis, K. Höckerstedt, E. Hämäläinen, C. Bannwart, S. Bloigu, A. Valtonen and A. Ollus — 527 Diet and urinary estrogen profile in premenopausal omnivorous and vegetarian women and in premenopausal women with breast cancer

Joseph Montalto, John W. Funder, Arthur B. W. Yong, Annette Callan, Harold E. Davies and John F. Connelly — 531 Serum C-19 steroid sulphates in females with clinical hyperandrogenism

R. C. Bonney, M. C. Dalby, C. J. Newton, S. Franks, R. W. Beard and V. H. T. James — 535 17β-Hydroxysteroid oxidoreductase activity in the endometrium of normal women and patients with pelvic pain and polycystic ovaries

J. A. Reyes-Esparza and Marta C. Romano — 541 An age-dependent thymic secretion modulates testicular function

S. Idres, C. Delarue, H. Lefebvre, A. Larcher, M. Feuilloley and H. Vaudry — 547 Mechanism of action of serotonin on frog adrenal cortex

P. E. Lønning, M. Dowsett, S. Jacobs, B. Schem, J. Hardy and T. J. Powles — 551 Lack of diurnal variation in plasma levels of androstenedione, testosterone, estrone and estradiol in postmenopausal women

Nadia Mouhadjer, Georges Pointis, André Malassine and Monique Bedin — 555 Testicular steroid sulfatase in a cryptorchid rat strain

R. Roy and A. Bélanger — 559 Lipoproteins: carriers of dehydroepiandrosterone fatty acid esters in human serum

A. D. Tait, L. C. Hodge and D. Abbs — 563 Biosynthesis of adrenal corticosteroids by the sesterterpene pathway via 23,24-dinor-4-cholen-3-one

A. Häusler, G. Monnet, C. Borer and A. S. Bhatnagar 567 Evidence that corticosterone is not an obligatory intermediate in aldosterone biosynthesis in the rat adrenal

Mark A. Levy, Martin Brandt, Dennis A. Holt and Brian W. Metcalf 571 Interaction between rat prostatic steroid 5α-reductase and 3-carboxy-17β-substituted steroids: novel mechanism of enzyme inhibition

D. Mavoungou, J. Lansoud-Soukate and A. Dupont 577 Steroid and gonadotropin hormone levels in young African women with filarial infection

T. Leal and J. Crabbé 581 Effects of aldosterone on $(Na^+ + K^+)$-ATPase of amphibian sodium-transporting epithelial cells (A6) in culture
